

# DON VISZNEKI

702-884-6303 | don@codebad.com

## OBJECTIVE

Project manager seeks position at an innovative, forward-thinking company, using broad software development experience to create systems that are works of art.

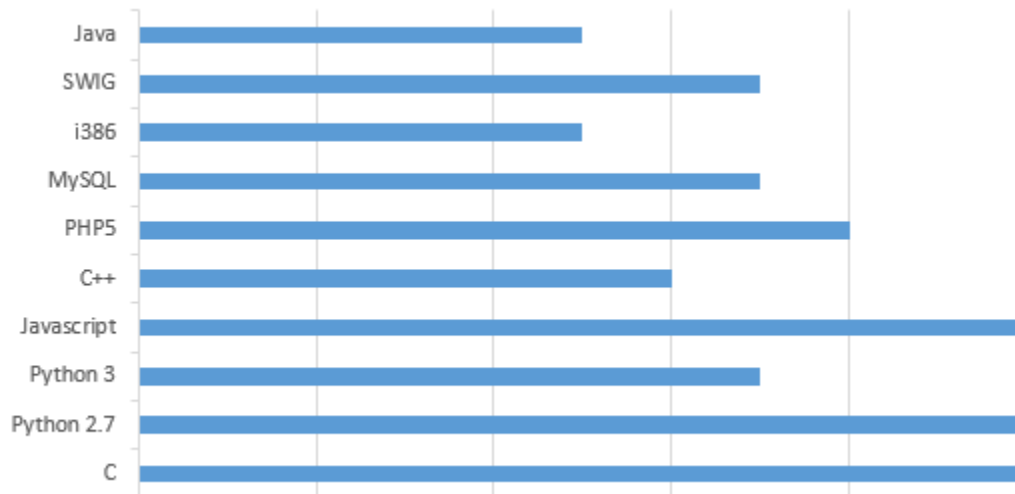

## PROFILE

I was creating contemporary “Web 2.0” web applications many years before XMLHttpRequest() was available. When the right tool for a job doesn’t exist, I create it. When the right tool does exist, I improve it.

## GENERAL SKILLS

Excellent at editing and writing technical documentation  
Great communication skills with non-technically inclined individuals  
Experience at interfacing with point of sales, business meetings, consultations, training

## PROFICIENCIES

## OTHER SKILLS

Linux administration, Apache 2, MSP430, AVR, XML, XSLT, XPath

## EXPERIENCE

**DevOps Manager** | Website Management Systems | December 2014 – Current

Encouraging improvements in infrastructure and procedure  
Multiple enterprise web applications  
Analysis and reporting systems  
Transitioned systems and applications to new network

**Software Engineer** | PageMail, Inc. / ChipTic, Inc. | July 2009 – September 2012

Software and system design

Maintained polyfill on GPSEE API (similar to Node.js)

Designed and implemented communications, reporting, and publishing system

Implemented HTTP request library, WebSockets client library, HTTP/database connector

Digitized tournament administration at the World Series of Poker. Every table was computerized.

**Field Engineer and Corrosion Analyst** | Matco Services, Inc. | April 2008 – September 2008

Executing and vetting new proprietary electrical technique for detecting subterranean corrosion

Employee development and training

Revised on-site testing procedures for thousands of guy-suspension towers

**Full-Stack Developer** | SocSurveys.org | June 2007 – February 2007

Met with sociological researchers and devised new technological means for optimizing research

Devised technological solutions to problems that previously could not be addressed by researchers

Designed and implemented web-based system conducting research

Co-designed and developed new competitor to industry-standard software used by sociological researchers for quantifying data from arbitrary multimedia for statistical analysis

**Lead Software Developer and System Architect** | Wasserman Technologies | October 2001 - June 2007

Advised lead device architect in feasibility and costs of numerous design strategies

Designed and implemented complex concurrent software systems to drive those devices
